Labelling solutions for packs and containers
MULTIVAC conveyor belt labellers apply labels precisely to a wide range of products. They offer the highest level of flexibility when it comes to label positioning, product handling, printing and inspection. They can be seamlessly integrated into filling or packaging lines, or can be used as a stand-alone solution with manual product infeed. Their modular design enables them to be ideally adapted, both technically and cost-effectively, to the widest range of labelling tasks.
Multivac’s modular constructed conveyor belt labellers offer the highest level of flexibility in the labelling of a wide range of packs, such as jars, bottles, cartons, tubular pouches, thermoformed packs or trays. They can be seamlessly integrated into existing filling or packaging lines, or they can be used as a stand-alone solution with manual product infeed.

</table>
Thermoformed packs / One track

L 330

- Maximum flexibility for top and bottom labelling and inspection of packs, for example, for cold cuts
- Exact product guiding using lateral toothed belts
- Maximum hygiene since no transport belts are required
- Maximum labelling speed due to servo technology

Thermoformed packs / Double track

L 310

- Double track solution for labelling of thermoformed packs
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology
Thermoformed packs / Multiple packs

L 310

- Labelling onto the top of single packages or each partial pack of a multiple pack
- Additional L-type labelling onto the rear side and the bottom
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology

Cylindrical bottles

L 320

- Wrap-around labelling of cylindrical products
- Precise spacing, guiding and orienting of the products
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology
Shaped bottles

L 320

- Front and back labelling of bottles
- Precise spacing, guiding and orienting of the products
- Wide range of options to fulfil a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology

Promotion label on skin packs

L 310

- Conveyor belt labeller with blow-on applicator for promotion labels
- Contactless label application onto sensitive products or into the pack
- Small footprint
- For recesses up to 90 mm
- Optimum line integration
Bags

L 310

- Labelling of formed, filled and sealed bags on a conveyor belt labeller
- Compact design with small footprint
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology

Cylindrical products with horizontal transport

L 310

- Wrap-around labelling of lying cylindrical products, such as whole sausages or tubular bags
- Manual or automatic product infeed in running direction of the transport system
- Conveyor belt with quick-change guide rails
- Secure and precise label application using a roll-on belt
Cylindrical products with horizontal transport

**L 340**

- Wrap-around labelling of lying cylindrical products, such as whole sausages or tubular bags
- Robust roller conveyor
- Manual product infeed at right angles to the running direction of the transport system
- Secure and precise label application using a roll-on belt

---

Trays

**L 310**

- Flexible labelling of trays onto the side or corner-wrap labelling over serveral sides
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology
- Optimum line integration
Boxes

L 310

- Flexible labelling of boxes, also around several corners
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Robust and low-maintenance

Folded paper products

L 350

- Sealing of the open edges of folded paper products, such as package inserts
- Labelling of up to 12,000 products per hour
- Optimum integration into the production line
- High availability due to low service requirements
Glasses

L 320

- Precise labelling of glasses onto the side or top
- Application of sealing labels
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology

Cups and pots

L 320

- Precise labelling of cups and pots onto the side or top
- Application of sealing labels
- Wide range of options to fulfill a variety of tasks, including printing and inspection
- Maximum labelling speed due to servo technology
Conveyor belt labeller

BASELINE L 300, L 310

- Optimum product transport due to various conveyor belt materials
- Wide range of belt lengths and widths available
- Split belts enable labelling of the bottom of packs
- Belts can be removed without tools for fast and easy cleaning
**Conveyor belt labeller**

**L 320**

- Product transport by modular plastic belts enables accumulating and rotating of the products
- Various options for product infeed and orientation
- Precise product handling and application of labels
Conveyor belt labeller

L 330

- Secure product transport due to lateral toothed belts
- Flexible access to the top and bottom of the products for marking and inspection
- Gap-free product transfer between belt segments
Conveyor belt labeller

L 340

- Roller conveyor for the horizontal transport of unstable, circular products
- Roll-on belt for wrapping the labels around the products
- Wide range of available roller widths to cover various product lengths
- Flexible adjustment to different product heights
Conveyor belt labeller

L 350

- Sealing of the open edges of folded paper products by labels, such as package inserts or paper leaflets
- Especially equipped to charge products directly from a folding machine
- Simple setting of different paper thicknesses
- Quick conversion to alternative paper formats and label sizes
MULTIVAC is there for you on site worldwide.

Our sales and service network comprises more than 85 subsidiaries. We are present on all continents and in all important markets. At all times and in all places, more than 1,000 consultants and service technicians will offer you expert advice and a comprehensive range of services covering all areas of packaging, as well as support you on your way to the best possible and most efficient overall solution. Our technical service, combined with rapid availability of spare parts, ensures that all MULTIVAC machines installed worldwide are at maximum readiness.
