GMS 1200 multicutt

Achieving the highest level of flexibility and accuracy with 3-dimensional forming.

- Flexible, 3-dimensional forming
- Very high yield
- Very high accuracy
- Flexible adjustment to various raw products
- Forming and cutting in one process
The multifunctional portioning system for exact portioning with minimal or no trim.

Mode of operation

› Multiple pieces of meat are placed onto the conveyor belt (buffer function).

› Then they are transported individually to the weighing conveyor.

› The piece of meat is transported from the weighing conveyor to the U-shaped mould.

› The upper unit with the C-shaped mould moves down and shapes the meat in the U-mould into an oval-shaped cross section.

› Then, the input piston presses the piece of meat against the discharge piston, squaring the edges of the meat.

› Once the piece of meat has reached the calculated cutting position, the spiral blade cuts the first piece.

› When the blade is back in the starting position, the meat is automatically moved to the next cutting position.

› After cutting is completed, the block of slices is pushed out onto the discharge conveyor.
GMS 1200 : Advantages & savings

- Flexible application for red meat in any consistency and size
- Increase in yield through waste-free portioning
- Give-away savings due to high weight accuracy
- High product quality due to equal slice shape and thickness
- Low labour costs and shortest product changeover times
- Perfect pack presentation

Typical applications

The GMS 1200 portions almost:

- Any kind of red meat
- In any consistency
- To any portion
- Always weight and yield optimised
- With minimal personnel

**Customised production lines**

Combine the GMS 1200 multicut to suit your requirements:

- **CBF 1000-2000 CYCLEFREEZE**
  - Quick and precise crust freezing for nearly all pieces of meat

- **PTT 500-1000-1500-2000 MULTITEMP**
  - Quick and precise tempering of pallets with meat in E1 and E2 boxes

- **MIS 3000-4000 MULTITRAY**
  - Manual tray system with length from 3-5 metres

- **GMI 500**
  - Weighing, sorting and reworking station for 100% fixed weight

**Offline diagnosis:**

Many machine types allow us to diagnose errors quickly online, thus enabling us to help you quickly.

**Service hotline:**

Feel free to call our experienced experts and they will find a solution for you as quickly as possible:

**Your specialist for profitable meat portioning**

**Perfectly matching components**

TVI offers innovations in the area of meat portioning. Our services range from meat tempering, portioning of almost all types of red meat, across the manual and automatic tray filling, weighing and resorting to transferring the fixed weight portions to the packaging machine.

**Customised production lines**

The various GMS models are flexible meat processing centres that can carry out any portioning task perfectly thanks to the standard modules and customer-specific programmes.

The various TVI machines create customised lines designed for your requirements.

**Modifications reserved. To apply: Data of the offer and TVI standard warranty and contract terms.**
